Exploring the Road Less Traveled

Findfar's mantra is to seek the road less traveled, venturing into unexplored territories that showcase the truly unique aspects of our world. From hiking through dense rainforests to uncover ancient civilizations to summiting towering mountains, her daring spirit has taken her to places most people only dream of.

One of her most memorable expeditions was venturing into the heart of the Amazon rainforest, where she encountered indigenous tribes and learned about

their rich cultural heritage. Through her experiences, Findfar aims to inspire others to appreciate and conserve the wonders of the natural world.

Documenting the Journey

As an avid photographer, Findfar's lens captures the essence of each destination she visits. Through her stunning photographs, she transports her audience to breathtaking landscapes and introduces them to vibrant cultures. Her work has

been featured in numerous prestigious publications, captivating readers and inspiring them to embark on their own escapades.

The Philanthropic Side

Findfar believes in giving back to the communities she encounters during her journeys. Through her philanthropic efforts, she has supported local schools, healthcare centers, and conservation initiatives. She recognizes the importance of sustainable tourism and strives to make a positive impact on the places she explores.

Inspiring Wanderlust Worldwide

Findfar's adventures have not only impacted those she meets in person but also a global audience. Through her website, captivating blog posts, and social media presence, she has amassed a substantial following of fellow travel enthusiasts. Her stories and advice inspire wanderlust, encouraging individuals to step out of their comfort zones and embark on their own extraordinary adventures.

In a world where conformity often reigns, Findfar Beth Aune stands out as an exceptional individual who fearlessly pursues her dreams. Her insatiable desire for exploration, dedication to documenting her journeys, and commitment to uplifting communities make her a true role model for aspiring travelers. Let Findfar's remarkable journey spark your imagination and ignite the flame of wanderlust within you.

FindFar is the third volume in the series which began with MindWar in 2013 and continued with MindStar in 2016.

The first book introduced a practical technology for reducing if not completely eliminating the scourge of physical warfare afflicting humanity by neutralizing violent irrationality in the human subconscious and replacing it with the impulse to creative cooperation. These artificial but completely benign Psychological Controls (PSYCONs) are integrated with a new framework for international problem-solving, reverse-engineered to eliminate crises preemptively. The laboratory proposed for MindWar is a complete, evolutionary redesign of the U.S. Army's Special Operations branches into a new MindWar TriForce.

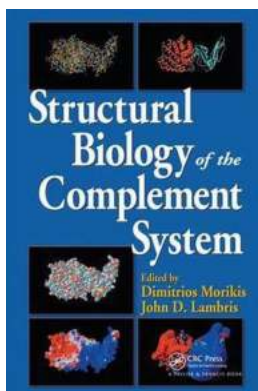

Whereas MindWar concentrates exclusively on the physical machinery of the human brain, MindStar adds the missing element of metaphysical identity: what humans until now have only vaguely sensed as the "soul". Now this genius at the core of every sentient being is brought into full illumination and definition as the MindStar. Both its distinction from and integration with the physical mentality are addressed.

And finally FindFar completes this evolutionary adventure by superseding old, static, three-dimensional analysis and planning with the fourth-dimensional MindWar dynamic of “FindFar”, changing the future from reactive to active, and adding the fifth dimension of individual creative perspective enabled by the MindStar.
