“Serial Killer” as a term can be difficult to define. Different criminal investigation units typically require two, three, or more attributable killings over a period of time before an individual can be considered to have joined the ranks of the serial killers. reached their end of their emotional tether, the crimes of serial killers have often been planned days, weeks, or months in advance. Targets can be random, but the killings are often planned in great detail. From cannibalism to mental health concerns, from ritualistic witchcraft to a simple interest in violence, learning what motivates these people can offer both insight and further confusion.
