Media is a huge industry offering plenty of opportunities for young people with potential and passion. With the entry of private players and foreign investments, this industry is growing at a fast pace. The competition in media sector is fierce as it is now nothing but the survival of the fittest. It is no secret that only the best can get into this saturated yet covetous profession. Pretty face and sweet voice cannot make one go far in the media industry anymore. A journalist who wishes to advance in this field must be well equipped with specific knowledge and understanding. And, that is exactly what this book teaches. So you need to start learning now. For sure, you will need a lot more to offer than just a degree in journalism. Hence, this book attempts to share the bigger picture as well as bust some common myths and perceptions about journalism.

News channels in India have come a long way from a single, government-owned and controlled news channel, to literally over 400 national and regional (language) channels owned by private players today. Media privatization is great for fostering free speech and expression. Moreover, the mushrooming of media channels has made the competition extremely fierce. Competition is welcome, but it should not be at the cost of compromising the quality of news and the ethics of journalism. Don't forget, "with great power comes greater responsibility".
