Nature has been an inspiration for artists and photographers for centuries. It is no surprise that Lee Wilson, with an artist's eye, manages to capture the artistry hidden within nature's vast landscapes. His photographs depict the perfect balance between light and darkness, colors and contrasts, evoking a sense of awe and wonder.

Exploring Mother Earth

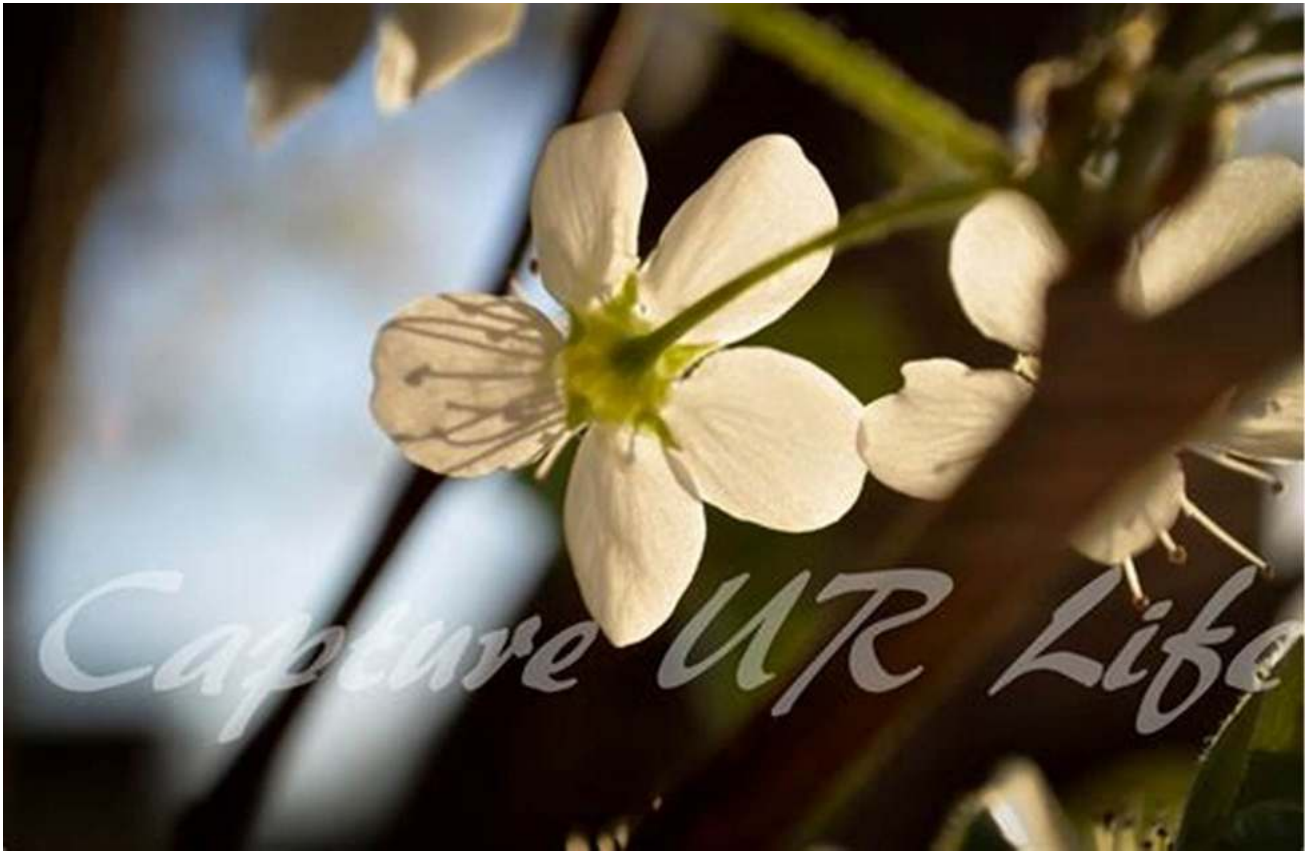

Lee Wilson's lens takes you on an adventurous journey through the diverse landscapes of our planet. Whether it's the lush green rainforests of the Amazon, the arid deserts of Africa, or the icy glaciers of Antarctica, Wilson's photographs transport you to these far-flung corners of the Earth. You can almost feel the wind on your face, the sound of the waves crashing against the cliffs, and the scent of the blooming flowers.

A Symphony of Colors

Nature is a master painter, using an infinite palette of colors to create breathtaking landscapes. Lee Wilson's photographs capture these vibrant hues in all their glory. From the fiery reds of a sunset to the golden yellows of a field of sunflowers, Wilson's images make you appreciate the true beauty and diversity of the natural world.

Details That Delight

Often, it's the smaller details in nature that captivate us the most. Lee Wilson's keen eye for detail allows him to reveal the intricacies that go unnoticed by the casual observer. From the delicate patterns on a butterfly's wings to the intricate designs on a spider's web, his photographs highlight the exquisite beauty found in nature's tiniest elements.

Preserving Nature's Treasures

Through his photography, Lee Wilson aims to raise awareness about the importance of preserving our natural environment. These photographs serve as a reminder of the fragile beauty that surrounds us and the need to protect it for future generations. Wilson's images are a testament to the power of nature and a call to action for all who appreciate its wonders.

The book incorporates informal photographs related to nature and its links, it is an imminent visual book, without further pretensions. To have a good ratp. In this second part we will travel part of the world in photographs.

The book incorporates the second part of the so-called observation tourism.

The environment is not reduced to the space in which the life of living beings develops, but also includes human beings, animals, plants, objects, water, soil, air and the relationships between them, as well as elements as intangible as culture. Some authors are reluctant to use the concept of "environment" as a direct translation of the English word "environment", since they consider it a redundancy that mediates and distorts the concept "environment", which already defines what is wanted. express. However, the concept of “environment” seems to have settled both in common language and in that of institutional leaders.
