Film editing has come a long way since its inception. In the early days of cinema, editing was rudimentary, simply connecting shots in chronological order. As technology advanced and filmmakers began experimenting with different techniques, editing became more sophisticated. From the groundbreaking works of Soviet filmmaker Sergei Eisenstein in the 1920s to the innovative use of jump cuts by Jean-Luc Godard in the French New Wave movement, every era has contributed to the evolution of film editing.

In the Blink of an Eye is celebrated editor Walter Murch's vivid, multifaceted, thought-provoking essay of film editing. Starting with what might seem to be the most basic editing question—Why do cuts work?—he treats the reader to a marvelous 'ride' through the esthetics and practical concerns of cutting film. Along the way, he offers his insights on such subjects as continuity and discontinuity in editing, dreaming, and real life; the criteria of a good cut; and the blink of an eye as both an analog to and an emotional cue for the cut. New to this second edition is Murch's lengthy meditation on the current state of digital edition.
