Modern Photography: Pushing Boundaries

In the modern era, technology has revolutionized the art of photography. With the advent of digital cameras and post-processing software, photographers have limitless possibilities for creativity and experimentation. "Seduced By Art" showcases contemporary photographers who are pushing the boundaries of traditional photography and exploring new forms of visual expression.

One of the highlights of the exhibition is the merging of photography with other art forms, such as painting and sculpture. These interdisciplinary approaches challenge the conventions of photography and blur the line between reality and imagination. The use of mixed media, digital manipulations, and unconventional techniques result in thought-provoking and visually captivating photographs that expand our perception of the world.

Furthermore, the emergence of social media platforms has transformed how we consume and interact with photography. Instagram, with its square format and filters, has given rise to a new generation of photographers who captivate millions of followers with their aesthetically pleasing images. "Seduced By Art" acknowledges the impact of social media on contemporary photography and explores the role of digital platforms in shaping the art form.

The Allure of Seduced By Art

What sets "Seduced By Art" apart from other photography exhibitions is its ability to captivate the viewer and immerse them in the world of art photography. Another unique aspect of this exhibition is the incorporation of interactive installations. Visitors can step into a photographer's studio, experience the development process in a darkroom, or even experiment with their own photography skills. These interactive elements create an immersive and memorable experience for the viewers, allowing them to connect with the art form in a more personal way.

EM Forster's famous dictum "Only connect!" is often quoted out of context but it is a resoundingly emotive phrase which might also be taken as the motto for the first major excursion by the National Gallery, London, into the history, portent and meaning of photography as a medium. Before *Seduced by Art: Photography Past and Present*, the National Gallery has only exhibited the work of a contemporary photographer on one occasion. Peter Blake, an artist famous for using many found sources including photographs in his work, much of which is based on elaborate collage and montage, was an artist-in-residence at the gallery in 1994-1996. But even the most tolerant observer would characterize the National Gallery's handling of contemporary art and/or photography as patchy, if not downright wobbly. This reviewer's experience has been that most of the gallery's interventions, however laudable in intent, have, with exceptions, diminished the contemporary and obscured the historic.
