

# The Miracle Of The Sun - Unveiling an Extraordinary Phenomenon

The Miracle of the Sun, an event that captivated thousands and left an indelible mark on history, has puzzled skeptics and believers alike for decades. This extraordinary phenomenon occurred on October 13, 1917, in the small town of Fatima, Portugal, where three young shepherds claimed to have witnessed a series of supernatural events.

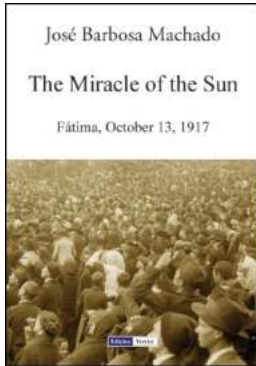

Lucia dos Santos and her cousins, Francisco and Jacinta Marto, were attending to their flock when a bright light illuminated the sky. Startled, they saw the apparition of the Virgin Mary, who delivered messages and prophecies urging humanity to change its ways.

As the days went by, anticipation grew among the townspeople, and on that fateful day in October, a crowd of approximately 70,000 people gathered in Fatima, hoping to witness something extraordinary. It was on this day, as promised by the Virgin Mary, that the Miracle of the Sun occurred.

## **The Astonishing Events of October 13, 1917**

The atmosphere was charged with anticipation as the crowd awaited the events that would unfold. Dark rain clouds covered the sky, creating a sense of unease among those present. Suddenly, the rain stopped, and the clouds parted, revealing an incredible spectacle that left everyone speechless.

Witnesses described a spinning disk of light shining in various colors and emitting rays of energy. The sun, they claimed, began to dance and pulsate, seemingly descending towards Earth. People who had come in fear and skepticism found themselves filled with awe and wonder. Some even reported experiencing miraculous healings and conversions.

## **Scientific Explanations and Skepticism**

As word spread about the Miracle of the Sun, skeptics sought to find a rational explanation for the extraordinary event. Some suggested that it was a mass hallucination or a psychological phenomenon triggered by the power of suggestion. Others proposed natural explanations such as an atmospheric anomaly or optical illusion.

However, these theories failed to account for the diverse eyewitness accounts and the profound impact the event had on the observers. Scientists and experts struggled to provide a satisfactory explanation, leaving the Miracle of the Sun shrouded in mystery and open to interpretation.

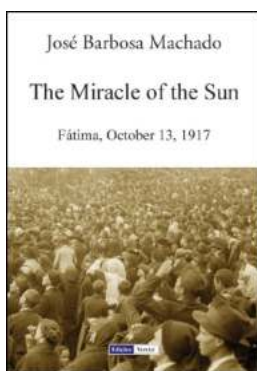

## **Divine Intervention or Mass Delusion?**

The Miracle of the Sun continues to provoke debate and speculation over a century later. Some interpret it as a divine intervention, a confirmation of the messages delivered by the Virgin Mary. Others believe it was a collective hallucination, fueled by religious fervor and an emotionally charged atmosphere.

Regardless of one's beliefs, the Miracle of the Sun remains a testament to the power of faith and the capacity of extraordinary events to inspire and impact humanity. Its allure continues to attract pilgrims and researchers seeking answers and hoping to unravel the secrets hidden within this astonishing phenomenon.

The Miracle of the Sun stands as a symbol of the inexplicable, a remarkable event that defies scientific explanations. Whether an act of divine intervention or a product of collective imagination, it undeniably left an indelible mark on those who witnessed it and ignited debates that continue to this day.

The world may never fully comprehend the Miracle of the Sun, but its significance persists, reminding us of the mysteries that lie beyond our understanding and the power of belief to transform our lives.

Analysing the photos taken on 17 October 1917 in Fatima by Benoliel, the so-called miracle of the sun, the author of this essay verified that in two of them tracks of smoke were visible and an object in the sky that, according to his knowledge of astrophysics and meteorology, could not be the sun. With many doubts about his discovery, he felt that the only way to check it would be to see the picture's negative and confirm whether or not those objects and tracks of smoke were the same, or if they were merely extrinsic stains. This essay sheds some light on what went unnoticed by researchers for more than 100 years and it seeks to demonstrate that some of the photos are a unique testimony to the phenomenon that occurred in Fátima on October 17, 1917.
