Financial orientation is a term that has been thrown around a lot lately, but what does it really mean? While many think of it as simply managing money, Hannah Maguire believes it goes much deeper than that. According to her, financial orientation is about aligning your financial decisions with your values and goals to create a life that truly brings you happiness and fulfillment.

The Birth of a New Approach

Hannah Maguire didn't start out as a financial expert. In fact, she comes from a background in psychology and spent years studying human behavior and motivation. It was during this time that she began to notice something interesting – people's financial decisions were often dictated by factors that had nothing to do with money.

She saw individuals who spent money on luxury items to impress others, only to end up feeling empty and unsatisfied. She saw couples who fought constantly about money, yet had no idea why. And she saw young adults who were afraid to pursue their dreams because they were bogged down by student loan debt.

Driven by a desire to help others break free from these patterns, Hannah Maguire dove headfirst into the world of finance. She combined her knowledge of human behavior with her newfound expertise in personal finance to create an entirely new approach – financial orientation.

The Principles of Financial Orientation

Financial orientation is based on a set of principles that guide individuals in making thoughtful and intentional financial decisions. While each person's financial orientation will be unique to them, there are a few key principles that Hannah Maguire believes everyone should consider:

1. Identify Your Values

The first step in financial orientation is identifying what truly matters to you. This means taking the time to reflect on your values and priorities in life. Are you someone who values experiences over material possessions? Or are you more focused on achieving financial security? Understanding what matters most to you will help guide your financial decisions.

2. Set Goals

Once you've identified your values, the next step is to set goals that align with them. Do you want to travel the world? Start your own business? Retire early? By

setting clear and specific goals, you can create a roadmap for your financial journey.

3. Track Your Spending

Financial orientation is all about being mindful of your spending. By tracking your expenses and understanding where your money is going, you can make informed decisions about what is truly worth your hard-earned cash. This means cutting back on mindless impulse purchases and focusing on the things that truly bring you joy and fulfillment.

4. Invest in Yourself

Financial orientation is not just about saving and investing for the future. It's also about investing in yourself and your personal growth. Whether it's pursuing higher education, attending conferences and workshops, or hiring a coach or mentor, investing in yourself can pay dividends in the long run.

5. Embrace Minimalism

As Hannah Maguire often says, "Less is more." Embracing a minimalist lifestyle can help you declutter not just your physical space, but also your financial life. By focusing on what truly matters to you and eliminating the excess, you can create a more fulfilling and financially stable life.

The Impact of Financial Orientation

Since launching her financial orientation approach, Hannah Maguire has helped countless individuals transform their relationship with money. She has worked with clients from all walks of life – from recent college graduates drowning in student loan debt to high-powered executives feeling unfulfilled in their careers.

Hannah Maguire has also caught the attention of major corporations and organizations seeking to bring a new perspective to their financial strategies. From Fortune 500 companies to non-profit organizations, the principles of financial orientation have proven to be valuable in a variety of settings.
