

Training Circular TC 09: Fire Support and Field Artillery Certification And

If you are involved in the field artillery or fire support operations, Training Circular TC 09 is a crucial resource for you. This certification program not only enhances your knowledge but also validates and verifies your skills in the field. In this article, we will take a closer look at Training Circular TC 09, its benefits, and how it contributes to the overall efficiency of fire support and field artillery operations.

What is Training Circular TC 09?

Training Circular TC 09 is a comprehensive training manual developed by the military to certify personnel in the field of fire support and field artillery operations. It covers a wide range of topics, including fire planning, target acquisition, field artillery systems, and operational procedures.

The aim of this certification program is to ensure that individuals possess the necessary skills and knowledge required to effectively support ground forces through indirect fire support and accurate target engagement. By implementing the guidelines outlined in Training Circular TC 09, military units can enhance their capability to quickly and accurately engage targets, providing valuable support to ground troops.

Benefits of Training Circular TC 09

The benefits of Training Circular TC 09 are numerous, both for individuals seeking certification and for military units as a whole. Here are some key advantages:

1. Enhanced Skills

Training Circular TC 09 provides a structured framework for improving skills in fire support and field artillery operations. It covers essential areas such as target selection, ammunition selection, and proper employment of field artillery systems. By following the guidelines in TC 09, individuals can effectively enhance their proficiency in these critical areas.

2. Standardization

Standardization is vital in the military, especially in operational procedures. Training Circular TC 09 ensures that the methodology and processes employed during fire support and field artillery operations are consistent across units. This standardization leads to better coordination and interoperability among different components of the military.

3. Professional Development

TC 09 serves as an invaluable resource for professional development. It provides individuals with the necessary knowledge and skills to advance in their field

artillery or fire support career. This certification is widely recognized and respected, making it a valuable asset for individuals seeking career advancement.

4. Improved Operational Efficiency

By adhering to the guidelines in Training Circular TC 09, military units can significantly improve their operational efficiency. The certification program emphasizes best practices and proven techniques, ensuring that units operate at their maximum potential during fire support and field artillery operations. Improved operational efficiency translates into better support for ground forces and increased mission success rates.

Key Topics Covered in Training Circular TC 09

Training Circular TC 09 covers a wide range of topics essential for fire support and field artillery certification. Some key topics include:

- Fire planning and target analysis
- Target acquisition and target intelligence
- Field artillery systems and platforms
- Fire support coordination and procedures
- Proper ammunition selection and employments
- Field artillery safety procedures
- Call for fire and observer operations

Training Circular TC 09 plays a crucial role in fire support and field artillery certification. It equips individuals with the necessary skills and knowledge to effectively support ground forces. By adhering to the guidelines outlined in TC 09,

military units can enhance their operational efficiency, standardize procedures, and improve overall mission success rates. Whether you are an aspiring field artillery specialist or already involved in fire support operations, Training Circular TC 09 is your key to success.

Training Circular TC 3-09.8 Fire Support and Field Artillery Certification and Qualification February

This manual, Training Circular TC 3-09.8 Fire Support and Field Artillery Certification and Qualification February 2019, provides the standards for implementing a Field Artillery (FA) gunnery program which incorporates all components of the FA system of systems within each FA formation at Battalion (BN) and below to include the Fire Support Teams and Cells which reside within all Brigade Combat Teams. This TC applies to all FA BNs whether in a Brigade Combat Team, Field Artillery Brigade or separate unit. The objective of the TC is to provide the basic requirements which will result in a safe, technically and doctrinally grounded, progressive, task-oriented gunnery plan which certifies and qualifies our Teams, Crews, Cells, Sections, Platoons, Batteries, and Battalions to provide accurate fires to supported commanders. FA, as a system of systems,

requires integrating functions or tasks performed by the critical elements of the unit to provide timely and accurate fires. The Artillery Tables I-VI provide the commander with a systematic means of training, certifying and qualifying sections/crews/teams that are critical to the solution of the gunnery problem. The tables provide progressive training from Military Occupational Specialty qualified individual tasks (Artillery Tables I) through collective gunnery training at the FA battalion level (Artillery Tables XVIII). The FA tables provide FA leaders and Soldiers with the “what” and “how” how to train utilizing materials that are standard across the Army. This TC provides a training strategy to help all FA units to become as accurate and responsive as possible given any condition in any environment. All FA units strive to achieve first round fire for effect. In order to accomplish this goal an artillery unit must compensate for nonstandard conditions as completely as time and the tactical situation permit. There are five requirements for achieving accurate first-round fire for effect. These requirements are accurate target location and size, accurate firing unit location, accurate weapon and ammunition information, accurate meteorological information, and accurate computational procedures. If these requirements are met, the firing unit will be able to deliver accurate and timely fires in support of the maneuver commander. If the requirements for accurate fire cannot be met completely, the firing unit may be required to use adjust-fire missions to engage targets. Adjust-fire missions can result in reduced effect on the target, increased ammunition expenditure, and greater possibility that the firing unit will be detected by hostile Target Acquisition assets.
