"Success is a journey, not a destination"

We have heard this expression before but what does it mean?

Regardless of your definition of success, one thing is undeniable. Your success, just like your life-isn't about you. Your life is about everyone else whose life you touch and the manner in which you do so.

The ability to create and develop deep and meaningful social connections, nurture and grow relationships, is the only measure of true success.

The greatest luxury in life is a social luxury. With this guide, you will increase your social value and learn how to acquire that social luxury.

You will discover how to:

- Use small talk as a gateway to a deep social connection
- Be the life of any party
- Tell memorable stories and keep your audience engaged
- Listen with intention and earn people's trust
- Make a memorable first impression and network like a boss
- Start and lead a conversation and make a lasting social connection
- Tap into your inner charisma and how to express your unique charismatic self

How the roadmap looks like:

Your Social Skills Guidebook has three parts.

Social Skills Fundamentals is the first part.

When it comes to social skills, there are a few fundamental things we can do to make social connections: Firstly, the ability to relate with others and earn their trust. To do so, we need to know how to make small talk work for us and how to listen with intention. In this part, we will also explore the power of storytelling and keeping people engaged while telling the story.

Networking is the second part of this book.

Here, the focus is primarily on the ongoing conversation in the larger social context that is networking. You will learn how to strike up the conversation and how to keep it going. We will cover the topic of the first impression from a different angle. I will share with you my personal techniques for remembering names and effectively using it to create deeper social connections.

Charisma is the last part of this book.

There are a lot of misconceptions and a veil of mystery surrounding the subject of charisma. As you will discover, charisma is nothing more than the result of the right attitude, exceptional communication and interpersonal skills. In this part, we will focus on the more advanced concepts of social skills such as: the philosophy of self-amusement, dealing with haters and verbal bullies, recognizing and pulling someone's emotional trigger, and additional methods for expanding your awareness.
